What Does 5G Sound Like? Expert Investigation Updated June 15, 2022

Today I'll share with you the radiation levels plus the eerie sound of 5G radiation coming

LinkedIn in testing has begun. Many are wondering:

what does 5G sound like?

EMF Protection Scams: Expo...

off the transmitters.

invisible environmental pollutant, beyond our awareness. My goal – using specialized equipment, is to

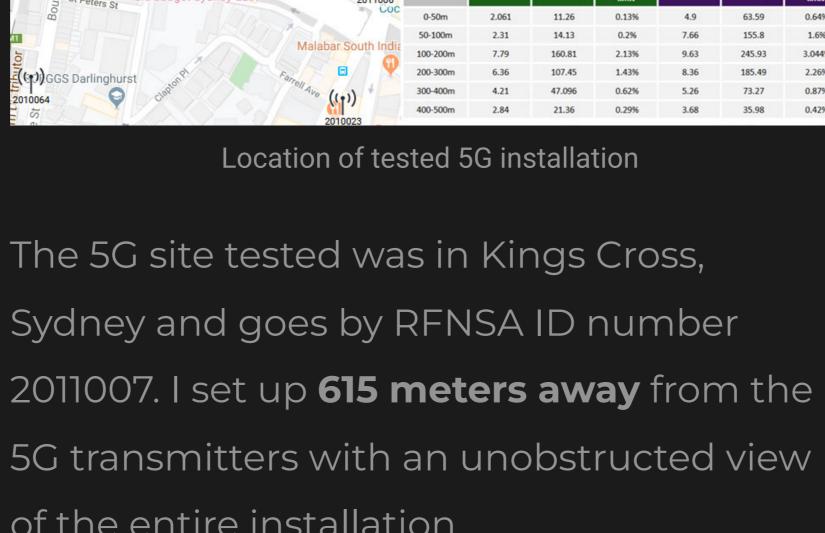

reveal both what **5G beam forming**

radiation sounds like and how much

The radiation from 5G (RF/microwaves) is an

radiation I'm being exposed to 600 meters away from the 5G transmitters.

St Luke's Private Hospital

transmitters alone, not including 3/4G which is also present at the site. This is a concern, especially since almost no one is using 5G phones (when I conducted

A maximum power density of 12,600 uW/m2

(crest factor applied) was detected from 615

meters away (2,018 ft) – that's 12 times the

IBN extreme level. This is also from the 5G

8000 ■RF Radiation 6000 2000 Tested 5G site (615m distance) Radiation level as compared to IBN guidelines from Germany **5G** is dramatically increasing

cell tower density (demand for high bandwidth data on mobile devices) and the

wireless technology we're bringing into our

However, in early 2019 as 5G was being

installed around the globe, most people

were very unaware of something of great

exposure to radio frequency / microwave

significance. A major escalation of our

radiation – specifically from 5G.

homes (Wi-Fi, cell phones etc).

A small study I conducted proved that once 5G was installed at cellular base station sites - there was **almost always a significant** increase in radiation.

100 mW/m² oland & Russ 0.0034 mW/m² Adverse Health Effects Begin at Low Levels 0.0034 mW/m² - Significantly reduced sperm count (Behari, 2006) 0.1 mW/m² - Increased stress hormones, dopamine decreased; adrenaline increased; chronic physiological stress in cells (Buchner, 2012) 1 mW/m² - Adverse neurological, cardio symptoms and cancer risk (Khurana, 2010) 1.6 - 10.5 mW/m² - Irreversible infertility in mice after 5 generations of exposure to RFR from an 'antenna park' (Magras & Xenos, 1997) 2 - 80 mW/m2 - Two-fold increase in leukemia in children (Hocking, 1996) 10 mW/m² - RFR induced pathological leakage of the blood-brain barrier (Persson, 1997)

For more on health effects see: • Physicians for safe technology • Bioinitiative report • 5G awareness summit • RF color charts • EMF Portal

itter locations were selected randomly. Major increases are seen across most sites. Data is from official EME reports as found on the Radio Frequency National Site Archive (RENSA

Those affected most will not only be those

It's going to impact all of us when just

living in direct line of sight to a cell tower.

13 - 57 mW/m² - Doubling of leukemia in adults (*Dolk*, 1997)

Exposed'.

What does 5G sound like?

20 mW/m² - Induced double-strand DNA damage in rat brain cells (Kesari, 2008)

925 mW/m² - Caused genetic changes in human white blood cells (Belyaev, 2005)

100 - 1,000 mW/m² - Increased risk in radar operators of cancer; very short latency period (*Richter, 2000*)

Often, 5G (and 4G) transmitters are placed hanging off highway signage, rooftops, cell tower structures – even inside tunnels and right above their entrance / exits. If you're interested in the **best way**

high pitch sound of 3 / 4G transmitters. It's highly erratic and almost sounds like static electricity. One can only imagine what kind of biological harm this kind of field has. Just

During my investigation I also managed to

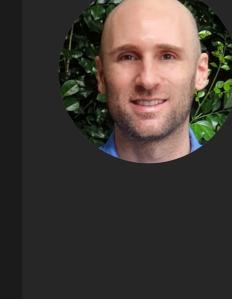

else! It has no resemblance to the smooth

capture the sound of 5G which is something

interesting to hear what others are feeling
